Department of Computer Science

B.Sc. (Hons.) Computer Science Curriculum and Syllabus (Applicable to the students admitted from AY: 2023 onwards)

School of Engineering and Sciences SRM University *AP*, Andhra Pradesh

Department Vision

To create technology innovators and leaders who can shape the future of society through technical, research, and entrepreneurial skills with a strong emphasis on interdisciplinary learning and collaborations.

Department Mission

- 1. Use effective teaching and learning pedagogies to enhance technical competency with a focus on computer science and engineering fundamentals.
- 2. Encourage interdisciplinary education and research by promoting the exchange of ideas among a varied community of researchers, educators, and learners.
- 3. Develop a substantial body of knowledge for industrial applications.
- 4. Create an outstanding interdisciplinary research atmosphere.
- 5. Instil students with effective managerial skills, fostering their development into competitive and visionary entrepreneurs.

Program Educational Objectives (PEO)

- 1. To enhance student's foundational knowledge and computer science concepts by improving analytical and computational approaches by understanding societal and technological challenges.
- 2. To promote a strongly interdisciplinary approach that integrates the study of multiple academic disciplines which can develop skills required to build careers in various emerging fields of Science.
- **3.** To engage in the understanding of emergent computing technologies to identify and communicate innovative solution for significant problems across a broad range of application areas.

Mission of the Department to Program Educational Objectives (PEO) Mapping

| | PEO 1 | PEO 2 | PEO 3 |
|---------------------|-------|-------|-------|
| Mission Statement 1 | 3 | 3 | 2 |
| Mission Statement 2 | 2 | 2 | 1 |
| Mission Statement 3 | 1 | 3 | 1 |
| Mission Statement 4 | 2 | 2 | 2 |
| Mission Statement 5 | 3 | 3 | 3 |

Program Specific Outcomes (PSO)

- 1. Apply their knowledge of computing system, algorithmic principles and mathematical foundations to develop innovative solutions to current and emerging computing problems.
- 2. Design, implement, and evaluate a computer-based system to meet realistic requirements.
- 3. Adapt new technologies, tools and methodologies to remain at the leading edge of computer science developments and practice in the profession and in the academic field.

Mapping Program Educational Objectives (PEO) to Program Learning Outcomes (PLO)

| | Program Learning Outcomes (PLO) | | | | | | | | | | | | | | |
|-------|---|--|--|--|----------------------------|-------------------------------|-----------------------------------|--|-----------------------------------|-------------------------|--------------------------------|--|-------|-------|-------|
| | POs | | | | | | | | | | PSOs | | | | |
| PEOs | Scientific and Disciplinary Knowledge | Analytical Reasoning and Problem Solving | Critical and Reflective Thinking | Scientific Reasoning and Design Thinking | Research Related Skills | Modern Tools and ICT Usage | Environment and Sustainability | Moral, Multicultural and Ethical Awareness | Individual and Teamwork Skills | Communication Skills | Leadership Readiness Skills | Self-Directed and Lifelong Learning | PSO 1 | PSO 2 | FOO 3 |
| PEO 1 | 3 | 2 | 2 | 1 | 1 | 3 | 1 | - | - | 2 | - | 1 | 3 | 2 | 3 |
| PEO 2 | 1 | _ | 2 | 2 | - | 3 | - | 1 | 2 | 2 | - | 2 | 2 | 3 | 1 |
| PEO 3 | 2 | 2 | 2 | 1 | - | 3 | - | - | 3 | 3 | 1 | 3 | 3 | 1 | 3 |

Note: L-T/D-P/Pr and the class allocation is as follows.

- a) Learning Hours : 30 learning hours are equal to 1 credit.
- b) Lecture/Tutorial : 15 contact hours (60 minutes each) per semester are equal to 1 credit.
- c) Discussion : 30 contact hours (60 minutes each) per semester are equal to 1 credit.
- d) Practical : 30 contact hours (60 minutes each) per semester are equal to 1 credit.
- e) Project : 30 project hours (60 minutes each) per semester are equal to 1 credit.

Course Objectives / Course Learning Rationales (CLRs)

- > To develop and enhance students' proficiency in listening, speaking, and reading skills,
- > To help the participants understand the purpose and differentiate various types of audience.
- > To prepare the students to produce Language in various contexts be it Oral or Written form.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Develop advanced listening skills, to comprehend and respond to a wide range of spoken language varieties, accents, and contexts with increased accuracy and fluency. | 2 | 90% | 90% |
| Outcome 2 | Articulate ideas and thoughts clearly and effectively in both informal and formal settings, utilizing appropriate vocabulary, grammar, and speech delivery techniques. | 3 | 90% | 90% |
| Outcome 3 | Enhance their reading comprehension and critical analysis abilities, enabling them to understand complex texts, extract key information, and critically evaluate the content within various genres and subjects. | 3 | 70% | 70% |
| Outcome 4 | Engage in effective and meaningful conversations, demonstrating improved listening skills, oral communication abilities, and comprehension of written texts, thereby enhancing their overall language proficiency and communication competence | 2 | 60% | 60% |

Course Objectives / Course Learning Rationales (CLRs)

- Demonstrate proficiency in written communication, including the ability to compose clear, grammatically structured and organized written documents, as well as deliver well-structured and engaging presentations
- Critically analyse and synthesize information from various sources, conduct research, and effectively use evidence to support their arguments in both written assignments and oral presentations, that will enhance their critical thinking and research skills
- > Through a combination of theoretical knowledge and practical exercises, the course aims to enhance students' ability to express ideas clearly, engage an audience, and deliver persuasive and impactful messages in both written and spoken formats.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Develop coherent and well-structured written communication by generating clear and concise written content with logical organization, appropriate grammar | 2 | 90% | 90% |
| Outcome 2 | Recognize and analyse the expectations of specific target audiences by adjusting tone, language and style to suit the intended purpose of the audience of written communication and tailoring written content to various formats such as reports, essays, emails, and professional correspondence. | 3 | 90% | 90% |
| Outcome 3 | Demonstrate confident Public Speaking with the ability to deliver structured, well-organized, and persuasive presentations by employing visual and interactive aids, storytelling techniques. | 3 | 70% | 70% |
| Outcome 4 | Develop strong critical thinking and research skills, enabling them to evaluate information critically, synthesize sources effectively, and provide well-reasoned arguments in their written work and presentations. | 2 | 60% | 60% |

Universal Human Values and Ethics

Course Objectives / Course Learning Rationales (CLRs)

- To cultivate deep understanding of human values by teaching students the core principles of universal human values and their significance.
- To promote ethical decision-making skills by equipping the students with the ability to make ethical choices in life, work, and society.
- To foster a diverse and inclusive ethical perspective by sensitizing the students to diversity, equity, inclusion, gender, and cultural differences.
- > To highlight the relevance of ethics in society and professions by showcasing the practical importance of ethics in personal, societal, and professional contexts.
- > To address common challenges by preparing the students to overcome obstacles to ethical behaviour, fostering a commitment to universal values.

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Evaluate the significance of value inputs in formal education and start applying them in their life and profession | 1 | 70% | 80% |
| Outcome 2 | Students will foster diverse and inclusive perspectives, contributing to more equitable and harmonious communities and workplaces | 2 | 70% | 70% |
| Outcome 3 | Students will be able to apply ethical principles effectively in their personal and professional lives, leading to improved relationships and ethical practices in society | 3 | 60% | 70% |

| Unit No. | Syllabus Topics | Required Contact Hours | CLOs Addressed | References Used |
|---------------|--|------------------------------|-------------------|--------------------|
| | Introduction to Management | | | |
| Unit No. 1 | Definition and nature of management: Understanding what management entails and its significance in achieving organizational goals. Evolution of management theories: Exploring the historical development of management theories from classical to modern approaches. Functions of management: Introduction to the four primary functions of management – planning, organizing, leading, and controlling. Roles and responsibilities of managers: Analysing the various roles managers undertake, including interpersonal, informational, and decisional roles. | 12 | 1 | 1,3,5,11 |
| Unit No. 2 | Planning and Decision-Making Importance of planning in management: Understanding the role of planning in setting organizational objectives and guiding future actions. Types of plans: Strategic, tactical, and operational plans and their relevance at different organizational levels. Decision-making process and techniques: Exploring the steps involved in decision making and different decision-making techniques such as rational, intuitive, and bounded rationality. Setting goals and objectives: Learning how to establish SMART (Specific, Measurable, Achievable, Relevant, Time-bound) goals and objectives to facilitate effective planning. | 12 | 1, 2 | 1,2,3,5,12 |
| Unit No. 3 | Organizational Structure and Design Organizational structure and its types: Understanding the different types of organizational structures, including functional, divisional, matrix, and network structures. Departmentalization and span of control: Examining how organizations group activities into departments and the implications of span of control on managerial effectiveness. Authority, responsibility, and delegation: Understanding the concepts of authority, responsibility, and delegation in organizational settings and their impact on managerial decision making. Factors influencing organizational design: Analysing internal and external factors that influence organizational design, such as strategy, environment, technology, and size. | 12 | 3 | 4,5,8,9,11 |

| | Total Contact Hours | 60 | | | | |
|---------------|---|----|------|-------------|--|--|
| Unit No. 5 | Process of control: Understanding the control process, including establishing standards, measuring performance, comparing results, and taking corrective action. Types of control: Exploring different types of control mechanisms, including feedforward, concurrent, and feedback control, and their applications in organizational settings. Performance appraisal methods: Analysing various performance appraisal methods such as graphic rating scales, behaviourally anchored rating scales (BARS), and 360-degree feedback. Continuous improvement and quality management: Understanding the concepts of continuous improvement and quality management, including Total Quality Management (TQM). | 12 | 4 | 1,7,12 | | |
| Unit No. 4 | Theories of leadership: Exploring various leadership theories, including trait theory, behavioural theory, contingency theory, and transformational leadership. Leadership styles and their effectiveness: Understanding different leadership styles such as autocratic, democratic, laissez-faire, and their impact on employee motivation and performance. Motivation theories: Examining motivational theories such as Maslows hierarchy of needs, Herzberg two-factor theory, and expectancy theory, and their implications for managerial practice. Techniques for motivating employees: Exploring practical techniques and strategies for motivating employees, including recognition, rewards, job enrichment, and empowerment. | 12 | 1, 3 | 2,3,8,11,13 | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. The objective is to equip the students with mathematical definitions, proofs, and applicable methods.
- 2. To enable the students to use mathematically correct terminology and notation.
- 3. Use foundational concepts in number theory and algorithms and developing problem-solving skills through the application of mathematical reasoning and induction principles.
- 4. Familiar about graphs and graph models, terminology, and special types is to understand the fundamental concepts and applications of graphs in various domains.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Express an argument using predicates, quantifiers and logic connectives and determine if the argument is valid. | 2 | 80% | 80% |
| Outcome 2 | Apply the rules of inferences and methods of proofs including direct and indirect proofs, proof by contradiction and mathematical induction. | 3 | 70% | 60% |
| Outcome 3 | Describe set properties, set operations, set identities, and representing relationship between the sets. | 2 | 80% | 70% |
| Outcome 4 | Discover whether a given function is one-one, onto and invertible. | 4 | 70% | 60% |
| Outcome 5 | Define the concept of divisibility, congruence, greatest common divisor, prime numbers, and prime factorization of numbers. | 1 | 80% | 80% |
| Outcome 6 | Apply counting principles to determine probabilities and solving problems using recurrence relations. | 3 | 70% | 60% |
| Outcome 7 | Explain graphs, their representations and determine the Euler circuits, Hamilton circuits, Euler paths and Hamilton paths in a graph. | 3 | 80% | 80% |

Object Oriented Programming with C++

| Course Code | CSC 201 | Course Category | Core (| Course(CC) | L 3 | Т 0 | P | C 4 |
|-------------------------------|---------|---------------------------------------|--------|--------------------------|--------|--------|----------|--------|
| Pre-Requisite Course(s) | | Co-Requisite Course(s) | NIL | Progressive Course(s) | | | | |
| Course Offering Department | CSE | Professional / Licensing Standards | | | | | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Introduce the concepts of Object Oriented Programming using C++ programming.
- 2. Apply the Object Oriented Concepts such as Class and Object in solving real-world problems.
- 3. Demonstrate the principles of inheritance and polymorphism to the design of abstract classes.
- 4. Apply exception handling and template creation using STL and interfaces.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Utilize the Object-Oriented Concepts in solving real word problems through C++. | 3 | 70% | 65% |
| Outcome 2 | Use Object Oriented Concepts such as Class and Object in solving real-world problems through C++. | 3 | 70% | 65% |
| Outcome 3 | Use the principles of Inheritance and Polymorphism through C++. | 3 | 70% | 65% |
| Outcome 4 | Use exception handling and template creation using STL and interfaces. | 3, 5 | 70% | 65% |

| Unit No. | Unit Name | Required Contact Hours | CLOs Addressed | Ref. Used |
|-------------|--|---------------------------|-------------------|--------------|
| Unit 1 | INTRODUCTION | 11 | | |
| 1. | Understanding the Object-Oriented World View, A way of viewing world – Agents and Communities, messages and methods, Responsibilities, Classes, Objects, and Methods. | 1 | 1 | 1 |
| 2. | OOP principles | 1 | 1 | 1,2 |
| 3. | An overview of C++, basic program construction - data types, variables, constants - type conversion, operators. | 1 | 1 | 2 |
| 4. | Decision making and looping constructs | 1 | | 1,2 |
| 5. | Arrays, strings and pointers | 2 | | |
| 6. | Functions, passing arguments, Returning values, Reference Arguments | 1 | | |
| 7. | Storage Classes | 1 | | |
| 8. | Dynamic memory management in C++ | 1 | | |
| 9. | Lab Experiment 1: 1. Takes two integer operands and one operator form the user, performs the operation and then prints the result. 2. Generate all the prime numbers between 1 and n, where n is a value supplied by the user. | 1 | 1 | 1 |
| 10. | Lab Experiment 2: 1. Write a program to demonstrate the Inline functions. 2. Programs to understand different function call mechanism. a. call by reference b. call by value | 1 | 1 | 1 |
| Unit 2 | FEATURES OF OBJECT-ORIENTED PROGRAMMING | 11 | | |
| 11. | Concept of classes and objects with real world examples | 1 | 1,2 | 2 |
| 12. | Encapsulation, data hiding using storage classifier | 1 | 1,2 | 2 |
| 13. | Polymorphism, Types of polymorphism, Use-cases | 1 | 1,2 | 2 |
| 14. | Method overloading, Method overriding | 1 | 1,2 | 2 |
| 15. | Virtual functions | 1 | 1,2 | 2 |
| 16. | Interfaces | 1 | 1,2 | 2 |
| 17. | Constructors and destructors | 1 | 1,2 | 2 |
| 18. | Methods, Method calling, Method with object parameters | 1 | 1,2 | 2 |
| 19. | Summary, Putting it all together with hands-on | 1 | 1,2 | 2 |
| 20. | Lab Experiment 3: 1. Write a Program to design a class having static member function Named showcount() which has the property of displaying the number of objects created of the class. 2. Write a Program using class to process Shopping List for a Departmental Store. The list includes details such as the Code No and Price of each item and perform the operations like Adding, Deleting Items to the list and Printing the Total value of a Order. | 1 | 2 | 2 |
| 21. | Lab Experiment 4: 1. Write a Program which creates & uses array of object of a class. (for eg. implementing the list of Managers of a Company having details such as Name, Age, etc). | 1 | 2 | 2 |

| | 2. Write a Program to find Maximum out of Two Numbers using friend function. Note: Here one number is a member of one class | | | |
|--------|---|----|-----|-----|
| | and the other number is member of some other class. | | | |
| Unit 3 | POLYMORPHISM | 13 | | |
| 22. | Concept of Polymorphism | 2 | 1,2 | 1,2 |
| 23. | Function overloading and its advantages | 1 | 1,2 | 2 |
| 24. | Pitfalls of function overloading | 1 | 1,2 | 2 |
| 25. | Operator overloading | 1 | 1,2 | 2 |
| 26. | Overloading unary operations | 1 | 1,2 | 2 |
| 27. | Overloading binary operators | 1 | 1,2 | 2 |
| 28. | Data Conversion | 1 | 1,2 | 2 |
| 29. | Pitfalls of operators overloading and conversions | 1 | 1,2 | 2 |
| 30. | Lab Experiment 5: 1. Write a Program to swap private data members of classes Named as class_1, class_2 using friend function. 2. Write a Program to design a class complex to represent complex numbers. The complex class should use an external function (use it as a friend function) to add two complex numbers. The function should return an object of type complex representing the sum of two complex numbers. | 1 | 2 | 2 |
| 31. | Lab Experiment 6: 1. Write a Program using copy constructor to copy data of an object to another object. 2. Write a Program to allocate memory dynamically for an object of a given class using class's constructor. | 1 | 2 | 2 |
| 32. | Lab Experiment 7: 1. Write a program to design a class representing complex numbers and having the functionality of performing addition & multiplication of two complex numbers using operator overloading. 2. Write a Program to overload operators like *, <<, >> using friend function. The following overloaded operators should work for a class vector. | 1 | 2 | 2 |
| 33. | Lab Experiment 8: 1.Write a Program to design a class to represent a matrix. The class should have the functionality to insert and retrieve the elements of the matrix. 2.Write a program to overload new/delete operators in a class. | 1 | 2 | 2 |
| Unit 4 | INHERITANCE | 13 | | |
| 34. | Inheritance in real world, definition and applications | 1 | 1,2 | 2 |
| 35. | Derived and Base Classes | 1 | 1,2 | 2 |
| 36. | Derived class constructor, Overriding member functions | 1 | 1,2 | 2 |
| 37. | Inheritance in the English distance class | 1 | 1,2 | 2 |
| 38. | Class hierarchies | 1 | 1,2 | 2 |
| 39. | Inheritance and graphics shapes | 1 | 1,2 | 2 |
| 40. | Public and private inheritance, Levels of Inheritance | 1 | 1,2 | 2 |

| 41. | Multiple Inheritance, Ambiguity in Multiple Inheritance with Example | 1 | 1,2 | 2 |
|--------|---|----|-----|---|
| 42. | Aggregation: Classes within classes | 1 | 1,2 | 2 |
| 43. | Lab Experiment 9: 1.Write a Program to design a class to represent a matrix. The class should have the functionality to insert and retrieve the elements of the matrix. 2.Write a program for developing a matrix class which can handle integer matrices of different dimensions. Also overload the operator for addition, multiplication & comparison of matrices. | 1 | 2 | 2 |
| 44. | Lab Experiment 10: 1. Write a Program illustrating how the constructors are implemented and the order in which they are called when the classes are inherited. Use three classes Named alpha, beta, gamma such that alpha, beta are base class and gamma is derived class inheriting alpha & beta. 2. Write a Program to design a student class representing student roll no. and a test class (derived class of student) representing the scores of the student in various subjects and sports class representing the score in sports. The sports and test class should be inherited by a result class having the functionality to add the scores and display the final result for a student. | 1 | 2 | 2 |
| 45. | Lab Experiment 11: 1. Write a program to maintain the records of person with details (Name and Age) and find the eldest among them. The program must use this pointer to return the result. 2. Write a Program to illustrate the use of pointers to objects which are related by inheritance. | 1 | 2 | 2 |
| 46. | Lab Experiment 12: 1. Write a program illustrating the use of virtual functions in class. 2. Write a program to design a class representing the information regarding digital library (books, tape: book & tape should be separate classes having the base class as media). The class should have the functionality for adding new item, issuing, deposit etc. the program should use the runtime polymorphism. | 1 | 2 | 2 |
| Unit 5 | TEMPLATES AND EXCEPTIONS | 12 | | |
| 47. | Templates: Function templates | 1 | 1,2 | 2 |
| 48. | Class templates | 1 | 1,2 | 2 |
| 49. | Exceptions: Need of Exceptions, keywords, | 1 | 1,2 | 2 |
| 50. | Simple and Multiple Exceptions | 1 | 1,2 | 2 |
| 51. | Re-throwing Exception and Exception Specifications, Custom Exception. | 1 | 1,2 | 2 |
| 52. | Standard Template Library: Containers, Algorithms, iterators - potential problems with STL | 1 | 1,2 | 2 |
| 53. | Algorithms: find (), count (), sort (), search (), merge () | 1 | 1,2 | 2 |
| 54. | Function Objects: for each (), transform () | 1 | 1,2 | 2 |
| 55. | Sequence Containers: vectors, Lists, Dequeues - Iterators and specialized. | 1 | 1,2 | 2 |
| 56. | Lab Experiment 13: 1. Write a program to show conversion from string to int and vice-versa. 2. Write a program showing data conversion between objects of different classes. | 1 | 2 | 2 |

| 57. | Lab Experiment 14: 1. Write a program showing data conversion between objects of different classes and conversion routine should reside in destination class. 2. Write a program to copy the contents of one file to another. | 1 | 2 | 2 |
|-----|---|---|---|---|
| 58. | Lab Experiment 15:1. Write a program to implement the exception handling.2. Write a program to maintain the elementary database of employee using file concepts. | 1 | 2 | 2 |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To impart basic skills to analyse the performance of algorithms.
- 2. To train the students to choose appropriate algorithm design techniques for solving problems.
- 3. To make aware how the choice of data structures and algorithm design methods impact the performance of programs.
- 4. To impart basic proficiency to deal with NP problems and to develop approximate algorithms wherever required
- 5. To create an understanding of the basic issues of complex and efficient algorithms.
- 6. To introduce advanced topics of Backtracking and Branch and bound algorithms required in state space search.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Choose appropriate algorithm design techniques for solving problems. | 4 | 70% | 65% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Identify key concepts associated with creative problem-solving and critical analysis.
- 2. Interpret and summarize various models and frameworks used in fostering creative and critical thinking skills.
- 3. Apply divergent thinking methods to generate innovative solutions to multifaceted problems.
- 4. Assess and compare the strengths and weaknesses of various critical thinking approaches in decision-making.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Define and describe fundamental concepts and theories related to creativity and critical thinking. | 1 | 80% | 80% |
| Outcome 2 | Explain the significance of creativity and critical thinking in problem-solving and decision-making processes. | 2 | 80% | 60% |
| Outcome 3 | Implement critical thinking strategies to analyse and evaluate information and arguments effectively. | 3 | 80% | 70% |
| Outcome 4 | Analyse and assess the effectiveness of specific creative thinking methods in addressing real-world problems. | 4 | 80% | 70% |

| | Total Contact Hours | 49 | | | | |

<u>Course Unitization Plan – Lab</u>

| Exp No. | Experiment Name | Required Contact Hours | CLOs Addressed | References Used |
|---------|--|------------------------------|-------------------|--------------------|
| 1 | Install /configure java development kit (JDK), android studio and android SDK. Configure android development tools (ADT) plug-in and create android virtual device. | 2 | 2 | 2 |
| 2 | Declare two classes Student and Teacher. The classes will have the data members and constructors as per your convenience. Write a JAVA program, (i) where the Teacher will enter the marks of the all the students in the database. (ii) Once the marks are entered, the student can view the marks. | 2 | 1 | 8 |
| 3 | Define a package named gradepack. The gradepack consists of a class named operations. The operations class consists of the methods to compute the average, minimum, maximum, median and standard deviation. Create a class named GradesStatistics, which reads in n grades (of int between 0 and 100, inclusive) and displays the average, minimum, maximum, median and standard deviation by importing the gradepack package. (Pass the grades information to the methods in the operations class.) Display the floating-point values upto 2 decimal places. | 2 | 1 | 8 |
| 4 | Create three classes named Student, Teacher, Parent. Student and Teacher class inherits Thread class and Parent class implements Runnable interface. These three classes have run methods with statements. The task of the teacher class of the first assignment has to be synchronized. Similarly, the other two classes should have run methods with few valid statements under synchronized. | 2 | 1 | 8 |
| 5 | a. Develop a program to implement linear layout and absolute layout.b. Develop a program to implement frame layout, table layout and relative layout. | 2 | 3 | 2 |
| 6 | Develop a program to implement Text View and Edit Text. b Develop a program to implement Auto Complete Text View. c Develop a program to implement Button, Image Button and Toggle Button. | 2 | 3 | 2 |
| 7 | Develop a program to implement login window using above UI controls.b. Develop a program to implement Checkbox, Radio Button and Radio Group,c. Progress Bar.d. Develop a program to implement List View, Grid View, Image View and Scroll View. | 2 | 3 | 2 |
| 8 | Develop a program to implement Date and Time Picker. | 2 | 3 | 2 |

| | b. Develop a program to implement Custom Toast Alert. | | | |
|-----------|--|---|------|---|
| 9 | Develop a program to create an activity. | | | |
| | b: Develop a program to implement new activity using explicit intent and | | | |
| | implicit intent. | 2 | 3 | 2 |
| | c: Develop a program to implement content provider | | | |
| | d: Develop a program to implement service. | | | |
| 10 | Develop a program to implement broadcast receiver. | | | |
| | b: Develop a program to implement sensors. | 2 | 3 | 1 |
| | c: Develop a program to build Camera. | | | |
| 11 | Develop a program for providing Bluetooth connectivity | | | |
| | b: Develop a program for animation | 2 | 3, 4 | 2 |
| | c: Perform Async task using SQLite. | | | |
| 12 | Create sample application with login module. (Check username and | | | |
| | password) On successful login, Change text view "Login Successful" | | | |
| | And on login fail, alert user using Toast "Login fail" | | | |
| | b: Create login application where you will have to validate username and | 2 | 3, 4 | 2 |
| | password till | | | |
| | c: the username and password is not validated, login button should | | | |
| | remain disabled. | | | |
| 13 | Develop a program to: i) Send SMS ii) Receive SMS. | | | |
| | b: Develop a program to send and receive e-mail | 2 | 3, 4 | 2 |
| | c: Deploy map based application. | | | |

| Pre-Requisite Course(s) | | Co-Requisite Course(s) | Progressive Course(s) | | | | |
| Course Offering Department | CSE | Professional / Licensing Standards | | | | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the advantages of DBMS over traditional file system and characteristics of DBMS.
- 2. Design ER-models to represent data of the organization.
- 3. Design relational database and execute various queries on the database using SQL.
- 4. Gain knowledge various anomalies that can occur in database and overcome those with the help of normal forms.
- 5. comprehend the purpose of transaction processing and concurrency control protocols.
- 6. Learn indexing schemes used in DBMS for the fast retrieval of data from the database.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Identify and design database structure for a system. | 4 | 70% | 65% |
| Outcome 2 | Design relational database and execute queries on the database using SQL. | 3 | 70% | 65% |
| Outcome 3 | Implement concurrency control protocols for transaction processing system. | 3 | 70% | 65% |
| Outcome 4 | Use indexing schemes for fast retrieval of data from the database. | 3 | 70% | 65% |

| | Overview: Connection oriented and connection less services. | 1 | 3 | 1,2 |
| | Comparison of packet switched, and circuit switched networks. | 1 | 3 | 1,2 |
| | Routing: proactive routing and reactive routing protocols, static and dynamic routing protocols. | 1 | 3 | 1,2 |
| | Dijkstra Algorithm, Distance vector routing and Link state routing protocols. | 1 | 3 | 1,2 |
| | Routing in wireless networks: AODV and DSR routing protocols. | 1 | 3 | 1,2 |
| | Overview of IP header and IP addressing. | 1 | 3 | 1,2 |
| | Classful IP addressing: Class A, B,C,D and E. | 1 | 3 | 1,2 |
| | Limitations of classful Addressing, Introduction to Subnet. | 1 | 3 | 1,2 |
| | Overview of Congestion: Warning Bit, Choke packets, Load | 1 | 3 | 1,2 |
| | Shedding, RED (Random Early Detection) | 2 | 3 | 2 |
| | Lab Experiment 6: Write a program to implement Dijkstra Shortest path routing protocol | Ĺ | 3 | 2 |

| | Lab Experiment 7: Write a program to implement Distance Vector Routing. | 2 | 3 | 2 |
|--------|--|----|---|---|
| Unit 4 | Internetworking and Transport layer | 11 | | |
| | IP Encapsulation and Tunnelling. | 1 | 4 | 1 |
| | IP packet fragmentation, ICMP, ARP. | 1 | 4 | 1 |
| | ICMP, DHCP, Introduction to Transport layer. | 1 | 4 | 1 |
| | Different end-to-end transport layer protocols: TCP and UDP. | 1 | 4 | 1 |
| | Brief explanation of TCP protocol. | 1 | 4 | 1 |
| | Brief explanation of UDP protocol. | 1 | 4 | 1 |
| | Packet formats for TCP and UDP protocol. | 1 | 4 | 1 |
| | Lab Experiment 8: Demonstrate TCP Client Server paradigm through simulation | 2 | 3 | 2 |
| | Lab Experiment 9: Demonstrate UDP Client Server paradigm through simulation. | 2 | 3 | 2 |
| Unit 5 | Transport and Application protocols | 23 | | |
| | TCP Connection Management Modelling. | 1 | 5 | 1 |
| | TCP Sliding Window. | 1 | 5 | 1 |
| | TCP congestion control. | 1 | 5 | 1 |
| | Introduction to application layer paradigms. | 1 | 5 | 1 |
| | Client Server model. | 1 | 5 | 1 |
| | Introduction and overview of HTTP protocol. | 1 | 5 | 1 |
| | Overview of FTP protocol. | 1 | 5 | 1 |
| | Operation of Electronic Mail. | 1 | 5 | 1 |
| | Introduction to peer-to-peer communication models. | 1 | 5 | 1 |
| | Introduction and overview of TELNET. | 1 | 5 | 1 |
| | Importance of Security in computer Networks. | 1 | 5 | 1 |
| | Lab Experiment 10: Write a program to implement echo command in client server socket programming. | 2 | 3 | 2 |
| | Lab Experiment 11: Write a program to simulate Trace-route command. | 2 | 3 | 2 |
| | Lab Experiment 12: Demonstrate the implementation of Ping command | 2 | 3 | 2 |
| | Lab Experiment 13: Write a code to display the class of IP address, network mask and generate the subnet IP address based on the subnet bits entered from the keyboard | 2 | 3 | 2 |
| | Lab Experiment 14: Write a code to implement sliding window protocol at the transport layer | 2 | 3 | 2 |
| | Lab Experiment 15: Simulate transfer file operation using TCP | 2 | 3 | 2 |

| Unit No. | Unit Name | Required Weeks | CLOs Addressed |
|----------|--|-------------------|-------------------|
| Unit 1 | Definition of Problem This unit focuses on clearly articulating the problem that the project aims to solve. Interns will describe the current situation, analyze gaps or challenges, and explain why a solution is necessary. Establishing a clear problem statement is essential to set a precise project direction. | 2 | 1 |
| Unit 2 | Method Interns will explore and apply various methods and approaches critical to the successful execution of the project. This unit includes planning, selecting suitable methods, and implementing best practices to achieve project objectives efficiently. | 2 | 1,2 |
| Unit 3 | Description of results This unit requires interns to interpret the results obtained from their project using appropriate software, tools, and analytical techniques. Emphasis is on accuracy, relevance, and coherence in presenting findings that support the project objectives. | 1 | 3 |
| Unit 4 | Strategy EvaluationStudents assess and critique the effectiveness of strategies and methodologies employed that support the project objectives. | 1 | 3 |
| Unit 5 | Project Presentation and thesis report Interns will prepare and deliver a scientific presentation of their results, providing well-supported reasoning. Additionally, they will compile their work into a thesis, manuscript, or report that summarizes the project, including methodology, results, and conclusions, adhering to academic or industry standards. | 1 | 4 |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To widen the understanding of doing research.
- 2. To facilitate the ideation of a thought.
- 3. To devise and plan ways to execute an idea.
- 4. To learn how to avoid plagiarism and publish one's contribution in the research community.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Conceptualize an idea | 2 | 75% | 70% |
| Outcome 2 | Devise a plan to do the literature survey on the idea | 4 | 75% | 70% |
| Outcome 3 | Formulate the mathematical model for the problem. | 3 | 75% | 70% |
| Outcome 4 | Assess the relevance and societal impact of the work | 5 | 70% | 65% |
| Outcome 5 | Write a technical paper and report the findings. | 6 | 75% | 70% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To enhance comprehension of both the theory that underpins and the accomplishments of artificial intelligence.
- 2. To introduce the concepts of a Rational Intelligent Agent and the different types of Agents that can be designed to solve problems.
- 3. To review the different stages of development of the AI field from human like behaviour to Rational Agents.
- 4. To impart basic proficiency in representing difficult real-life problems in a state space representation so as to solve them using AI techniques like searching and game playing.
- 5. To develop an awareness of the fundamental problems with knowledge representation, logic, blind and heuristic search, and other subjects like minimum, resolution, etc. that are crucial to AI systems.
- 6. To introduce advanced topics of AI such as planning, Bayes networks, natural language processing and Cognitive Computing.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Identify the Intelligent systems and Approaches. | 1 | 75% | 65% |
| Outcome 2 | Discuss the building blocks of AI as presented in terms of intelligent agents. | 2 | 75% | 65% |
| Outcome 3 | Formalize the problem as a state space, graph, design heuristics and select amongst search or game-based techniques to solve them. | 4 | 75% | 65% |
| Outcome 4 | Develop intelligent algorithms for constraint satisfaction problems and intelligent systems for Game Playing. | 5 | 75% | 65% |
| Outcome 5 | Implement application-specific intelligent systems | 3 | 75% | 65% |

Course Unitization Plan – Lab

| S.No. | Lab Experiment | Required Contact Hours | CLOs Addressed | References Used |
|-------|--|------------------------------|-------------------|--------------------|
| 1 | Artificial Intelligence Problem identification, PEAS description, and Introduction to PROLOG | 2 | 1 | 1, 2, 3 |
| 2 | Study of facts, objects, predicates, variables, arithmetic operators, simple input/output, and compound goals in PROLOG | 4 | 2 | 1, 2 |
| 3 | Study of string operations in PROLOG. Implement string operations like substring, string position, palindrome, and implement all set operations (Union, intersection, complement). | 4 | 1, 2 | 1, 2, 4 |
| 4 | Write a program for Usage of rules in Prolog. Create a family tree program to include following rules 1. M is the mother of P if she is a parent of P and is female 2. F is the father of P if he is a parent of P and is male 3. X is a sibling of Y if they both have the same parent. 4. Then add rules for grand-parents, uncle-aunt, sister and brother. | 4 | 2, 3 | 1,2 |
| 5 | Write programs for studying Usage of arithmetic operators in Prolog. a) Accept name of the student, roll no, his/her subject name, maximum marks and obtained marks in the subject. (Take marks of atleast 6 subjects). Compute the percentage of a student. Display his result with other information. b) Accept department, designation, name, age, basic salary, house rent allowance (HRA) of an employee. Compute dearness allowance (DA) which is 15% of basic salary. Determine the gross salary (basic salary + HRA + DA) of the employee. Display all information of the employee (Generate Payslip). | 4 | 4 | 1, 2, 3 |
| 6 | Implement a program for recursion and list in PROLOG | 4 | 4, 5 | 1, 2, 4, 5 |
| 7 | Write a program for studying usage of compound object and list in Prolog. a) Write a program to maintain inventory items using a compound object: Accept from user the details of at least 10 objects. Display from user the details of objects entered by user Find and display odd and even numbers from a given input list. | 4 | 5 | 3, 4, 5 |
| 8 | Write a program to solve the following problems. 1. Write a prolog program to solve "Water Jug Problem". 2. Write a program to implement a monkey banana problem. 3. Write a program to implement 8 Queens Problem. 4. Write a program to solve traveling salesman problem. 5. Write a program to solve water jug problem using LISP. | 4 | 5, 6 30 | 4, 5 |

| 2. | Lab Experiment 2: Create black and white images (A) of size 1024x1024. Which consists of alternative horizontal lines of black and white? Each line is of size 128. Create black and white images (B) of size 1024x1024. Which consists of alternative vertical lines of black and white? Each line is of size128. Perform the following operations on Image A and Image B. a. Image addition of A and B b. Subtraction of A and B c. Multiplying Images of A and B d. Create a grayscale image of size 256 x 1024. Intensity of image should vary sinusoidally. e. Create a white image of size 256x256, with black box of size 58x58 at centre. | 2 | 1 | 1 |
| 3. | Lab Experiment 3: | 3 | 2,3 | 1 |

| | Develop programs for following intensity transformation operation on a grayscale image. Collect any gray scale image from any source. Process that image using these operations. a. Image negative b. Log transformation and inverse log transform: s = c log (1+r), c is a const, r ≥ 0. s is pixel intensity of output image, r is the pixel intensity of input image. Study the effect of constant c on the quality of output image. c. Power law transformation: Study the effect of different values of Gamma used in this transformation. d. Contrast stretching e. Gray level slicing | | | |
|----|--|---|-----|---|
| 4. | Lab Experiment 4: Develop programs for following spatial filtering operations on a grayscale image. a. Averaging: Implement averaging filtering operations for different window sizes and study their effect on the quality of output image. Write your observations on output image quality. b. Weighted averaging: Implement weighted averaging filtering operations for different window sizes and study their effect on the quality of output image. Write your observations on output image quality. c. Median filtering: Implement weighted averaging filtering operations for different window sizes and study their effect on the quality of output image. Write your observations on output image quality. d. Max filtering e. Min filtering | 3 | 4,5 | 4 |
| 5. | Lab Experiment 5: Take a grayscale image and add salt and pepper noise. Write programs for following operations and observe their outputs a. Linear smoothing or Image averaging b. Weighted averaging c. Median filtering. Compare the output quality among Image averaging and median filtering. d. Max filtering e. Min filtering | 4 | 2,6 | 1 |
| 6. | Lab Experiment 6: Write programs to perform following sharpening operations on a grayscale image a. Laplacian filter b. Filtering using composite mask c. Unsharp masking d. High boost filtering e. Filtering using first order derivative operators such as sobel and prewitt mask. | 4 | 2,6 | 1 |
| 7. | Lab Experiment 7: Write a program to improve contrast of an image using histogram equalization. The prototype of the function is as below: histogram_equalisation(input_Image, no_of_bins); The function should return the enhanced image. Consider two low contrast input images. Study the nature of the output image quality in each case by varying the number of bins. | 3 | 2 | 1 |
| 8. | Lab Experiment 8: Take a low contrast grayscale image (A) and a high contrast gray scale image (B). Write a program to improve the contrast of A with the help of image B using histogram specification or matching. The prototype of the function is as below: Histogram_sp(input_Image, | 3 | 2 | 1 |

| | specified_Iage, no_of_bins); The function should return the enhanced image. | | | |
|-------|--|---|----|-------|
| 9. | Lab Experiment 9: Develop programs to implement frequency domain smoothing filters (Ideal, Butterworth and Gaussian) and apply these filters on a grayscale image. a. Compare/comment on the output of Ideal, Butterworth and Gaussian Low pass Filters having the same radii (cutoff frequency) value. b. Consider a suitable gray scale image and demonstrate the ringing effect on the output of Ideal low pass frequency domain filter. c. Compare the output of Butterworth low pass filters (order n=2) for different cutoff frequencies (5, 15, 30, 90, 120). d. Compare the output of Gaussian low pass filters for different cut-off frequencies (5, 15, 30, 90, and 120). | 3 | 2 | 1,2,3 |
| 10. | Lab Experiment 10: Develop programs to implement frequency domain sharpening/High pass filters (Ideal, Butterworth and Gaussian) and apply these filters on a grayscale image. a. Compare/comment on the output of Ideal, Butterworth and Gaussian High pass Filters having the same radii (cutoff frequency) value. b. Consider a suitable gray scale image and demonstrate the ringing effect on the output of Ideal high pass frequency domain filter. c. Compare the output of Butterworth high pass filters (order n=2) for different cut-off frequencies (5, 15, 30, 90, 120). d. Compare the output of Gaussian high pass filters for different cut-off frequencies (5, 15, 30, 90, and 120). | 3 | 2 | 1,2,3 |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the fundamental theory and concepts of neural networks, Identify different neural network architectures, algorithms, applications and their limitations.
- 2. Understand appropriate learning rules for each of the architectures and learn several neural network paradigms and its applications.
- 3. Comprehend the fuzzy logic and the concept of fuzziness involved in various systems and fuzzy set theory.
- 4. Understand the concepts of fuzzy sets, knowledge representation using fuzzy rules, approximate reasoning, fuzzy inference systems, and fuzzy logic.
- 5. Understand the Genetic Algorithm and able to identify the application area.
- 6. Understand soft computing techniques and their role in problem solving. Reveal different applications of these models to solve engineering and other problems.

Course Objectives / Course Learning Rationales (CLRs)

- 1. To introduce the basic concepts of Data Warehouse and Data Mining techniques.
- 2. Examine the types of data to be mined and apply pre-processing methods on raw data.
- 3. Discover interesting patterns, analyze supervised and unsupervised models and estimate the accuracy of the algorithms.
- 4. Learn various data mining algorithms and its application domain.
- 5. Understand the latest trends of research in data mining.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Students can be able to identify methods to create a data warehouse and pre-process the real world data to make it suitable for various data mining algorithms. | 2 | 75% | 70% |
| Outcome 2 | Students can be able to <i>implement</i> models to measure interestingpatterns fromdifferent kinds of databases. | 5 | 75% | 70% |
| Outcome 3 | Students can be able to <i>design</i> , <i>develop</i> and <i>model</i> various techniques such as clustering, classification, and association mining of real world data for public health and safety, and the cultural, societal, and environmental considerations. | 3 | 70% | 60% |
| Outcome 4 | Acquire the knowledge of advanced trends in data mining. | 4 | 70% | 60% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To learn the major milestones of historical development of IR systems.
- 2. To learn an architecture of a generic IR system and how to build one from scratch.
- 3. To understand how users interact with IR systems and how to maximize their satisfaction.
- 4. To learn the major theories and algorithms that are powering the modern search engines.
- 5. To gain hands-on experience in developing a working IR system.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Students will understand and implement the basic concepts in indexing and its compressed construction | 3 | 70% | 60% |
| Outcome 2 | Students will understand and implement the statistical IR models such as Probabilistic model, vector-space model, and language models. | 3 | 70% | 60% |
| Outcome 3 | Students will build a document retrieval system through the practical sessions, including the implementation of a relevance feedback mechanism. | 3 | 70% | 60% |
| Outcome 4 | Students will implement the Text/Document classification and clustering algorithms | 4 | 70% | 60% |
| Outcome 5 | Students will understand the issues involved IR techniques for the web including crawling, link-based algorithms. | 3 | 70% | 60% |

| Pre-Requisite Course(s) | | Co-Requisite Course(s) | Progressive Course(s) | | | | |
| Course Offering Department | CSE | Professional / Licensing Standards | | | | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Learn the basics of natural language processing and understand various steps in it.
- 2. To introduce the fundamentals of language processing from the algorithmic viewpoint.
- 3. To discuss various issues that make natural language processing a hard task.
- 4. To discuss some well-known applications of natural language processing

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Recall the fundamental concepts of natural language processing. | 1 | 70% | 68% |
| Outcome 2 | Demonstrate algorithms for word level and syntactic analysis of textual data. | 2 | 70% | 65% |
| Outcome 3 | Develop systems for language processing and information related tasks using text processing. | 3 | 70% | 60% |
| Outcome 4 | Implement systems using natural language generation algorithms and machine translation techniques based on user queries | 4 | 70% | 65% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the complexity of a problem can be solved using algorithms, and how much resources (in form of time and space) it takes to solve a problem algorithmically.
- 2. Studies problems that cannot be solved and problems for which it is difficult to design efficient algorithms and how we can recognize such hard problems.
- 3. Gives a precise definition of what an algorithm is via Turing machines.
- 4. Learn central complexity classes, in particular NP-complete problems.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Define an algorithm and identify the given problems that be solved | 1 | 70% | 65% |
| Outcome 1 | using an algorithm. | | | |
| Outcome 2 | Illustrate the ideas of solvability, computational models, and working | 1 | 65% | 60% |
| Outcome 2 | with Turing Machines. | | | |
| | Classify and apply decision problems into appropriate complexity | 2 | 65% | 60% |

Advanced Database Management Systems

Course Objectives / Course Learning Rationales (CLRs)

- To understand how to store data using fixed and variable length records in the file. 1.
- 2. To implement index structures in the file.
- 3. To implement query parsing and execution.
- 4. To understand concurrency control protocols used for transaction processing.
- 5. To understand recovery techniques for recovering from transaction failures.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Ortoore 1 | Outline DBMS components, data storage in files and implement | 2 | 750/ | 200/ |
| Outcome 1 | indexing schemes for fast retrieval of data. Explain B-tree, hash tables for complex data storage. | 2 | 75% | 80% |
| Outcome 2 | Plan query execution. Construct query compiler, planner and executor. | 3 | 70% | 75% |
| Outcome 3 | Analyse data base operations and Compare concurrency control protocols for transaction processing system. | 4 | 75% | 80% |
| Outcome 4 | Explain concurrency control and system failure | 2 | 75% | 80% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To understand the limitations of today's Cloud computing models which are not designed for the volume, variety, and velocity of data generated by billions of Internet of Things (IoT) devices.
- 2. To understand the features of Edge Computing architecture and analyse business models that address the challenges of resource management and optimization.
- 3. To familiarize with Edge applications that monitor real-time data from network-connected things and initiating action involving machine-to-machine (M2M) communication.
- 4. To understand how developers, write IoT applications for Edge Computing nodes that are closest to the network edge and ingest the data from IoT devices.
- 5. To understand how Edge Nodes, extend the Cloud to the Network Edge through the Case studies for Response time, Data storage time, coverage area, and kinds of applications.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Demonstrate various architectural models and design issues in Edge | 2 | 65% | 60% |
| Outcome I | Computing. | | | |
| Outcome 2 | Learn and apply various Edge+IoT communication paradigms and | 4 | 65% | 60% |
| Outcome 2 | Edge+Edge Middleware. | | | |
| Outcome 3 | Identify and mitigate Resource management and optimization | 3 | 65% | 60% |
| Outcome 5 | challenges of Edge Computing model. | | | |
| Outcome 4 | Develop efficient models for deployment and dimensioning of edge | 2 | 65% | 60% |
| Outcome 4 | networks | | | |
| Outcome 5 | Will gain hands on experience with different case studies and | 6 | 65% | 60% |
| Outcome 5 | simulation frameworks for real-life Edge applications. | | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To clarify the practical view towards the applications of these ideas in the engineering part of computer science.
- 2. Studies problems that cannot be solved and problems for which it is difficult to design efficient algorithms and how we can recognize such hard problems.
- 3. Gives a precise definition of what an algorithm is via Turing machines.
- 4. Learn central complexity classes, in particular NP-complete problems.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Identify the methods to prove the limitations of computational models. | 1 | 70% | 65% |
| Outcome 2 | Illustrate the ideas of solvability, computational models, and working with Turing Machines. | 1 | 65% | 60% |
| Outcome 3 | Classify and apply decision problems into appropriate complexity classes, including P, NP, PSPACE and complexity classes based on randomised machine models | 2 | 65% | 60% |
| Outcome 4 | Demonstrate NP-completeness basic hard problems. | 2 | 60% | 55% |
| Outcome 5 | Apply interactive proofs in the analysis of optimisation problems. | 3 | 60% | 55% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To enhance comprehension of both the theory that underpins and the accomplishments of artificial intelligence.
- 2. To introduce the concepts of a Rational Intelligent Agent and the different types of Agents that can be designed to solve problems.
- 3. To review the different stages of development of the AI field from human like behaviour to Rational Agents.
- 4. To impart basic proficiency in representing difficult real-life problems in a state space representation so as to solve them using AI techniques like searching and game playing.
- 5. to develop an awareness of the fundamental problems with knowledge representation, logic, blind and heuristic search, and other subjects like minimum, resolution, etc. that are crucial to AI systems.
- 6. To introduce advanced topics of AI such as planning, Bayes networks, natural language processing and Cognitive Computing.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Identify the Intelligent systems and Approaches. | 1 | 75% | 65% |
| Outcome 2 | Discuss the building blocks of AI as presented in terms of intelligent agents. | 2 | 75% | 65% |
| Outcome 3 | Formalize the problem as a state space, graph, design heuristics and select amongst search or game-based techniques to solve them. | 4 | 75% | 65% |
| Outcome 4 | Develop intelligent algorithms for constraint satisfaction problems and intelligent systems for Game Playing. | 5 | 75% | 65% |
| Outcome 5 | Implement application-specific intelligent systems | 3 | 75% | 65% |
| Outcome 6 | Represent logic-based techniques to perform inference and planning in given problems. | 6 | 75% | 65% |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To understand the limitations of today's Cloud computing models which are not designed for the volume, variety, and velocity of data generated by billions of IoT devices.
- 2. To understand the features of Edge Computing architecture and analyse the applications of AI in Edge Computing.
- 3. To familiarize with AI/ML models which can be deployed at edge to handle IoT applications.
- 4. To understand and develop applications for edge nodes that are closest to the network edge and ingest the data from IoT devices.
- 5. To understand how inferences can be drawn from ML workloads, performances of edge devices through the case studies.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |

Course Objectives / Course Learning Rationales (CLRs)

- 1. To learn architecture, design principles and techniques for internetworking of computer networks.
- 2. To gain in-depth knowledge on analysing, design, implement, monitor, and test the internetworking systems.
- 3. To understand the networking algorithms (specifically network, Transport) in the network simulator or through programming languages.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|--|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Define about basic network principles | 1 | 70% | 65% |
| Outcome 2 | Identify network layer architecture(framework) along with its functionalities for network protocol design. | 1 | 70% | 65% |
| Outcome 3 | Discuss internetworking protocols for wired and wireless networking. | 2 | 70% | 65% |
| Outcome 4 | Discuss the performance of heterogeneous networks with respect to transport layer protocols | 2 | 70% | 65% |

| | | Program Learning Outcomes (PLO) | | | | | | | | | | | | | |

Biometric Security

| Course Code | CSC 447 | Course Category | Core Elective (CE) | L | Т | Р | С |
|-------------------------------|---------|---------------------------------------|--------------------------|---|---|---|---|
| Course Coue | 030 447 | Course Category | Core Elective (CE) | 3 | 0 | 0 | 3 |
| Pre-Requisite Course(s) | | Co-Requisite Course(s) | Progressive Course(s) | | | | |
| Course Offering Department | CSE | Professional / Licensing Standards | | | | | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the fundamentals of biometric technologies and distinguish them from traditional techniques.
- 2. Analyse the strengths and weaknesses of leading physiological biometrics like finger-scan, facial-scan, and iris-scan.
- 3. Evaluate the principles and components of behavioural biometrics such as signature-scan and keystroke scan.
- 4. Assess privacy risks in biometric systems, design privacy-sensitive solutions, and comprehend biometric standards.
- 5. Gain proficiency in image processing techniques, image enhancement, segmentation, and its application in fingerprint and iris biometrics

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Demonstrate a comprehensive understanding of biometric fundamentals, technologies, and their applications in security systems | 2 | 75 % | 70% |
| Outcome 2 | Evaluate the strengths and weaknesses of different biometric modalities, including physiological and behavioural biometrics | 4 | 70 % | 65% |
| Outcome 3 | Privacy risks associated with biometric systems and design privacy- compliant solutions. | 2 | 70 % | 65% |
| Outcome 4 | Develop proficiency in image processing techniques, enhancing their ability to process and analyse biometric data. | 5 | 70 % | 65% |
| Outcome 5 | Implement fingerprint and iris biometric systems, including minutiae determination and iris recognition. | 5 | 70 % | 65% |

| UNIT I | Introduction: Biometric Fundamentals and Physiological Biometrics | 11 | 1 | 1,2 | |
| | Biometric fundamentals – Biometric technologies, Biometrics Vs traditional techniques, Characteristics of a good biometric system | 2 | 1 | 1,2 | |
| | Benefits of biometrics, Key biometric processes: verification, identification and biometric matching | 1 | 1 | 1,2,3 | |
| | Performance measures in biometric systems, FAR, FRR, FTE rate, EER and ATV rate, Applications of Biometric Systems, Security and Privacy Issues. | 2 | 1 | 1,2 | |
| | Physiological Biometrics: Leading technologies: Finger-scan, Facial-scan, Iris-scan, Voice-scan, components, working principles, | 2 | 1 | 1,2,3 | |
| | Competing technologies, strengths and weaknesses | 1 | 1,2 | 1,2,3 | |
| | Other physiological biometrics: Hand-scan, Retina-scan –components, working principles, competing technologies, strengths and weaknesses | 2 | 1 | 1,2 | |
| | Automated fingerprint identification systems | 1 | 1 | 1,2 | |
| UNIT II | Behavioural Biometrics and Privacy and Standards in Biometrics | 6 | | | |
| | Leading technologies: Signature-scan, Keystroke scan, components, working principles, strengths and weaknesses. | 2 | 1,2 | 1,2 | |
| | Assessing the Privacy Risks of Biometrics | 2 | 3 | 1,2 | |
| | Designing Privacy Sympathetic Biometric System | 1 | 3 | 1,2 | |
| | Need for standards – different biometric standards. | 1 | 3 | 1,2 | |
| UNIT III | Fundamentals of Image Processing | 12 | | | |
| | Digital Image representation, grayscale image, colour image: RGB, YCbCr, Binary Image | 2 | 4 | 1,2 | |
| | Fundamental steps in Image Processing Image Enhancement: The Spatial Domain Methods, | 2 | 4 | 1,2 | |
| | Image Enhancement: The Frequency Domain Methods | 2 | 4 | 1,2 | |
| | Image Segmentation: Pixel Classification by Thresholding, Histogram Techniques | 2 | 4 | 1,2 | |
| | Smoothing and Thresholding | 1 | 4 | 1,2 | |
| | Gradient Based Segmentation: Gradient Image, Boundary Tracking | 2 | 4 | 1,2 | |
| | Laplacian Edge Detection | 1 | 4 | 1,2 | |
| UNIT IV | Fingerprint Biometrics | 9 | | | |
| | Fingerprint Patterns, Fingerprint Features | 2 | 4 | 1,2 | |
| | Fingerprint Image, width between two ridges | 2 | 4 | 1,2 | |
| | Fingerprint Image Processing | 2 | 4 | 1,2 | |
| | Minutiae Determination | 1 | 4,5 | 1,2, 3 | |
| | Fingerprint Matching: Fingerprint Classification, Matching policies. | 2 | 4,5 | 1,2, 3 | |
| UNIT V | Iris Biometrics | 7 | | | |
| | Iris System Architecture, Definitions and Notations | 1 | 4,5 | 1,2,3 | |
| | Iris Recognition: Iris location, Doubly Dimensionless Projection, Iris code, Comparison | 2 | 5 | 1,2 | |
| | Coordinate System: Head Tilting Problem, Basic Eye Model | 2 | 5 | 1,2 | |
| | Searching Algorithm | 1 | 5 | 1,2 | |

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the historical development and significance of Intellectual Property Law and its role in the digital age.
- 2. Demonstrate knowledge of the trademark registration process, maintenance, and international trademark laws.
- 3. Comprehend the principles of copyright law, including ownership, duration, and international copyright issues.
- 4. Analyze the concept of Trade Secrets, their protection, and legal implications, including breach of contract and unfair competition.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Apply Intellectual Property Law principles to real-world scenarios effectively. | 2 | 70% | 65% |
| Outcome 2 | Navigate trademark registration processes and handle trademark- related legal issues competently. | 3 | 70% | 65% |
| Outcome 3 | Interpret copyright laws and address copyright-related disputes and challenges. | 3 | 70% | 65% |
| Outcome 4 | Comprehend and engage with patent law, including patent searches and international aspects. | 3 | 70% | 65% |
| Outcome 5 | Assess and safeguard trade secrets while understanding the legal consequences of breaches and unfair competition. | 4 | 70% | 65% |

Digital Forensics and Incident Response

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the fundamentals of incident response, cybersecurity forensics principles, and their relevance to cybersecurity operation.
- 2. Develop proficiency in preparation, including the formulation of policies, incident handling workflows, and the use of various incident response tools.
- 3. Gain expertise in the identification phase by mastering techniques for detection, triage, and incident classification, along with the use of indicators of compromise (IOCs).
- 4. Acquire the skills needed for effective containment, including damage limitation, system isolation, and forensic backup and imaging, while limiting malware spread.
- 5. Explore the digital forensics investigation process, including applicable laws, evidence collection, chain of custody, and the use of technical forensics tools and techniques, such as those for analysing hard disks, file systems, network devices, and mobile devices.

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | Apply incident response phases, policies, and procedures in real- world cybersecurity scenarios | 3 | 75 % | 70% |
| Outcome 2 | Effectively identify and classify security incidents using indicators of compromise (IOCs) and triage techniques. | 2 | 70 % | 65% |
| Outcome 3 | Demonstrate proficiency in containing and mitigating security incidents while limiting damage and malware spread. | 4 | 70 % | 65% |
| Outcome 4 | Conduct digital forensics investigations in compliance with applicable laws and chain of custody requirements. | 3 | 70 % | 65% |
| Outcome 5 | Utilize a range of technical forensics tools and techniques to analyze digital evidence and investigate cyberattacks. | 4 | 70 % | 65% |

Course Outcomes / Course Learning Outcomes (CLOs)

Course Objectives / Course Learning Rationales (CLRs)

- 1. Understand the fundamentals of information security and its relevance in modern data-driven environments
- 2. Explore deep packet inspection techniques for web security, including one-class multi-classifier systems and host intrusion detection.
- 3. Develop skills in automated correlation for constructing attack scenarios and gain insights into the challenges of privacy in security analytics.
- 4. Analyse security challenges and solutions for big data environments, including anomaly detection, anonymization, and encryption.
- 5. Examine the importance of privacy in big data and its legal aspects, covering topics such as GDPR or PDP compliance, digital identity protection, and defense against model poisoning attacks.

Course Outcomes / Course Learning Outcomes (CLOs)

| | At the end of the course the learner will be able to | Bloom's Level | Expected Proficiency Percentage | Expected Attainment Percentage |
|-----------|---|------------------|---------------------------------------|--------------------------------------|
| Outcome 1 | apply data mining techniques for effective network intrusion detection and web security. | 1 | 70 % | 65% |
| Outcome 2 | understand and apply adversarial machine learning concepts to enhance security analytics | 3 | 70 % | 65% |
| Outcome 3 | implement security measures for big data, including anonymization and encryption. | 5 | 70 % | 65% |
| Outcome 4 | evaluate privacy preservations in big data, compliance data protection laws. | 4 | 70 % | 65% |
| Outcome 5 | develop the capability to defend against model poisoning attacks in machine learning for security applications. | 3 | 70 % | 65% |
